Now, this is a preliminary to what I want to say to you about this whole question of corporations as affect-ing the public. There are very many and very difficult problems with which we are faced as one of the results of the forces, which, taken all together, we speak of as progress.

Boston and the thriving cities of Massachusetts have een built up as a result of those forces. There is but little use in regretting that things have not shaped themselves dif-ferently. We must, above all, show by our actions that our interest is permanent and not spasmodic, and we have got to see that all the steps are taken toward the solution. When a great corporation is sucfor violating an anti-trust law, it is not a move against property; it is a move in favor of property, because when you can make it evident that all men, big and small alike, have to obey the law, ou are putting the safeguard of law around all men. When you make it evident that no man shall be excused for violating the law, you make it evident that every man will be protected from violation of the law. I am inclined to think that much the greatest trouble in any immediate handling of the question of the trust comes from our system of government. Let me go back one moment.
